

Tested 0107

This month, we got stuck into **sat-nav units**, **mobile gaming devices**, **miniature music players**, **laptops**, **audio streamers**, **universal remotes** and **turntables**. God, we love this job.

SPINS & NEEDLES

Vinyl never died – it went underground, melted itself down and morphed into the coolest music format of them all. What went around has finally come around...

Getting started

- Record players output a very quiet signal, so your amplifier or mixer will need a phono stage amplifier. *Need, got it?*
- Not every turntable comes with a cartridge and stylus. If you're DJing, be sure to get one that's up to the abuse.
- If your turntable comes with an earth lead, make sure you ground it on something metal: ill-grounded decks will buzz and hum.

BEST FOR STYLE GURUS

Clearaudio Solution £1100

+49 (0)9131 59595 | www.clearaudio.de

What's the spin?

If you take interior design as seriously as you do music, the Solution is brilliant. Not only does it sound as detailed, precise, weighty and hip-shaking

as Clearaudio decks always do, but it's a vision in polished steel and aluminium. And when viewed from above, the Solution looks like the Mercedes-Benz trident, which is good enough for us.

Stuff says ★★★★★

Looks, sound, build quality – the Clearaudio is a joy.
