2. Package contents

The **clearaudio Ambient** turntable is delivered in a special packaging to ensure its safe transport. Please check the contents as per list below:

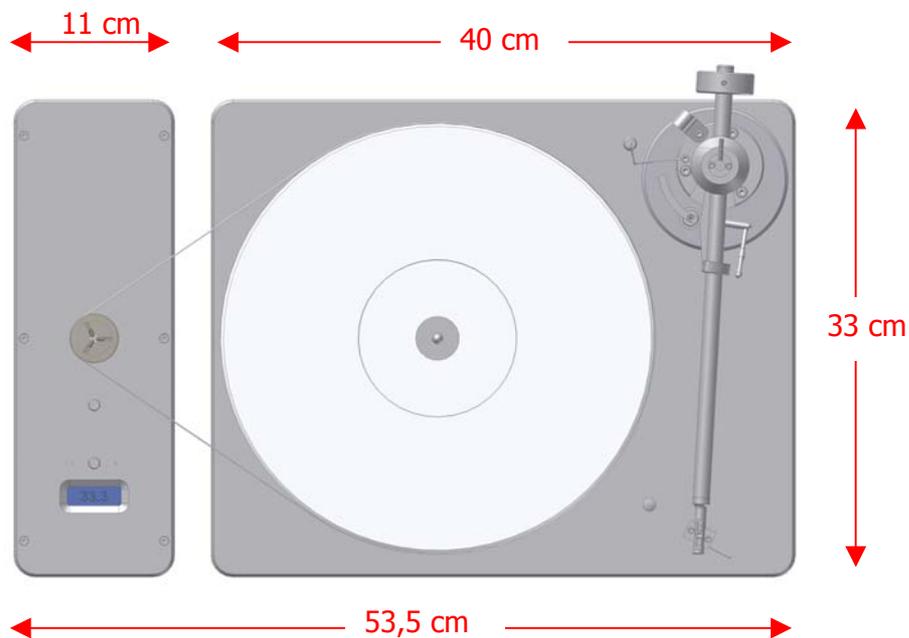

1	Motorunit with included „mini Syncro“ unit	2	Chassisplate 70-layers wood sandwich, silver anodised aluminum top & bottom plate
3	Tonearmbase (preassembled)	4	High-precision turntable platter made of solid silicon acrylic with patented CMB bearing
5	Pulley made of acrylic including fixing screws	6	Power supply unit(incl. 3 different plug units; EU, USA and GB)

7	Optional tonearm: (A-Unify/B-Satisfy) incl. accessory	8	Grounding cable for the bearingscrew
9	Clearaudio Clever Clamp	10	Shynthetic bearing oil (2.5 ml)
11	Screwdriver (for fixing the pulley)	12	levelgauge
13	Silent Belt Ø 1mm (2 x, therefrom 1 x spare)	14	Pair of white gloves
15	hexkeywrench	16	Warranty card (not shown)

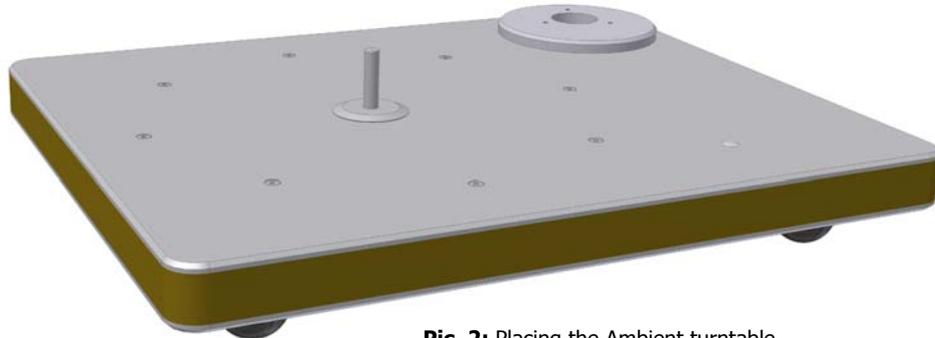

3. Set-up and operation

After you have checked the package contents as described in section 2, lay the parts out on a clean, safe flat surface for the **clearaudio Ambient** assembly. Assembly is fairly simple and straight forward as many parts have been preassembled at the factory. Please use the white gloves provided to prevent scratches and/or fingerprints during assembly. The smallest placing area for your **clearaudio Ambient** is 530 x 330 mm.

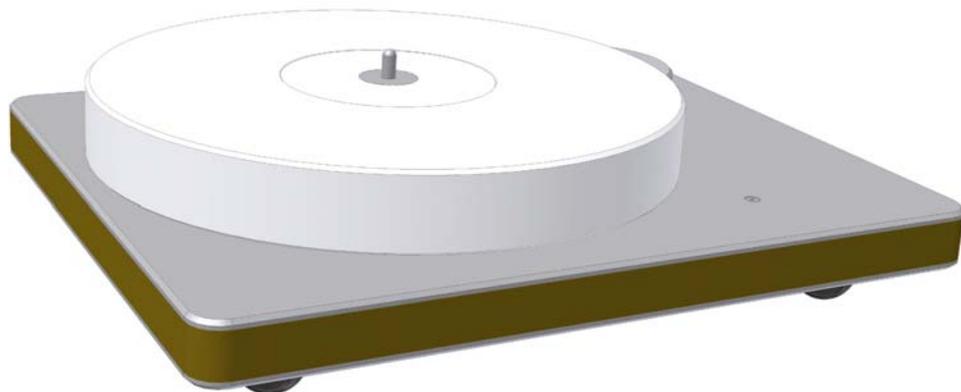

Pic. 1: Placing area Ambient turntable

Place the premounted chassisplate on a good turntable rack area optimised for low sensitivity of acoustical feedback.

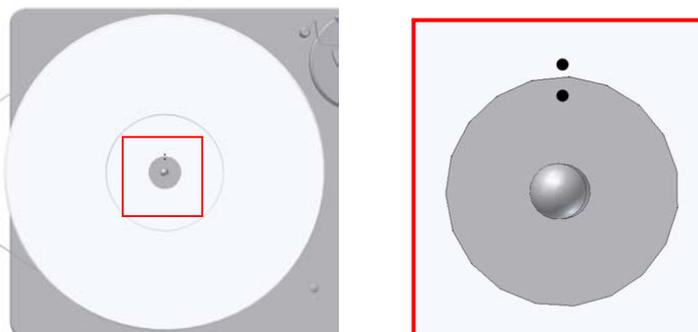

Pic. 2: Placing the Ambient turntable

Unpack the turntable platter with the upper part of the platter bearing. Remove the protective security tape from the bearing housing and place this unit carefully over the spindle mounted in the turntable chassis. **Do not use too much pressure for this step otherwise you will cause damage to the bearing. Caution: pay attention not to place any of the grease on the acrylic surface of the chassis!**

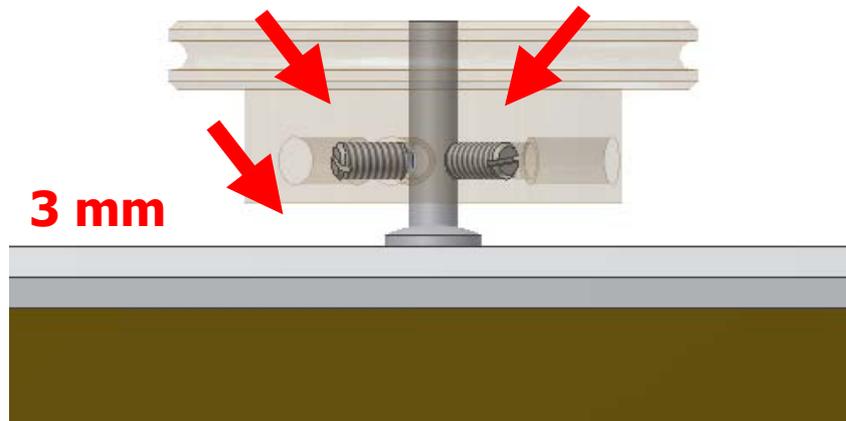

Pic. 3: Placing the turntable platter

Due to the high precision machining there could be left some air inside the bearing. The air will flow out after several turns of the platter. Please make sure that the two markings on the turntable platter and on the bearing are in one line (as shown in figure below). The correct position of these markings is very important, because they had been calibrated at the factory.

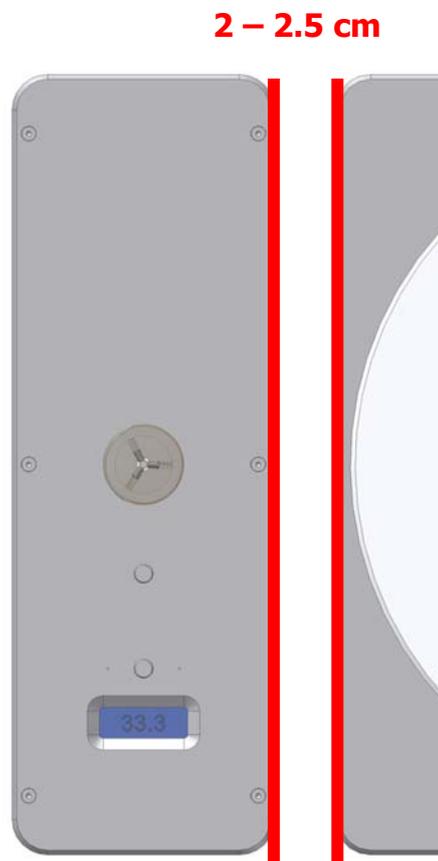

Pic. 4: Correct position of turntable platter and bearing

Place the pulley on the motor spindle. The distance between the pulley and the motor housing should be approx. 3 mm. Tighten the three little screws inside the pulley with the aluminium screwdriver provided.

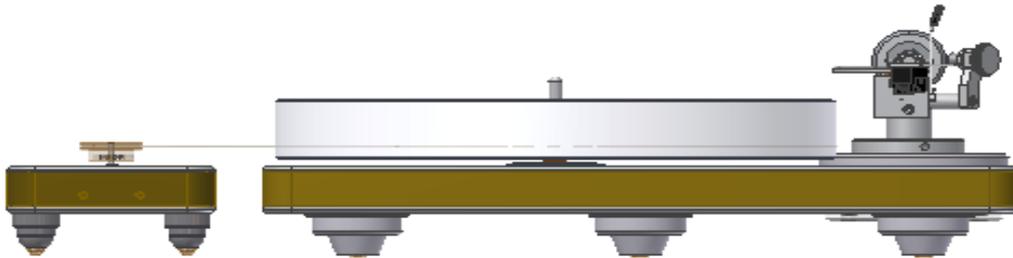

Pic. 5: Placing the pulley on the motor spindle

Place now the motorunit beside your Ambient turntable. The distance between the motorunit and the turntable should be **2 - 2,5 cm!**

Pic. 6: Distance between motor unit and Ambient turntable

Place the belt on the pulley of the motor unit. Please turn with your hand the platter some turns, that the belt is parallel.

Pic. 7: Placing the belt on the pulley

The following adjustment is very important:

Should the air bubble in the level gauge not be in the black circle (see at the blow up), please ensure then that your underground so will be according aligned. Only if the turntable will be aligned you will receive the optimum on sound.

4 Tonearm mounting

4.1 Unify mounting

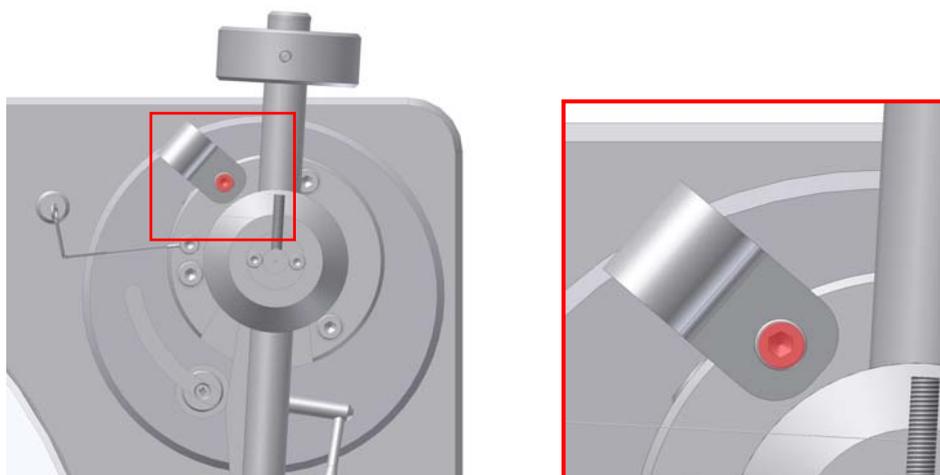

To mount the tonearm base to the Ambient armboard, please use the screws without nuts (M4x20) and place it like the red marked screws.

Pic. 10: Mounting the tonearm base

Carefully remove the security zip tie and unwrap the arm tube. **Caution:** *Once the security zip tie is removed not to inadvertently pull it out of the armwand.*

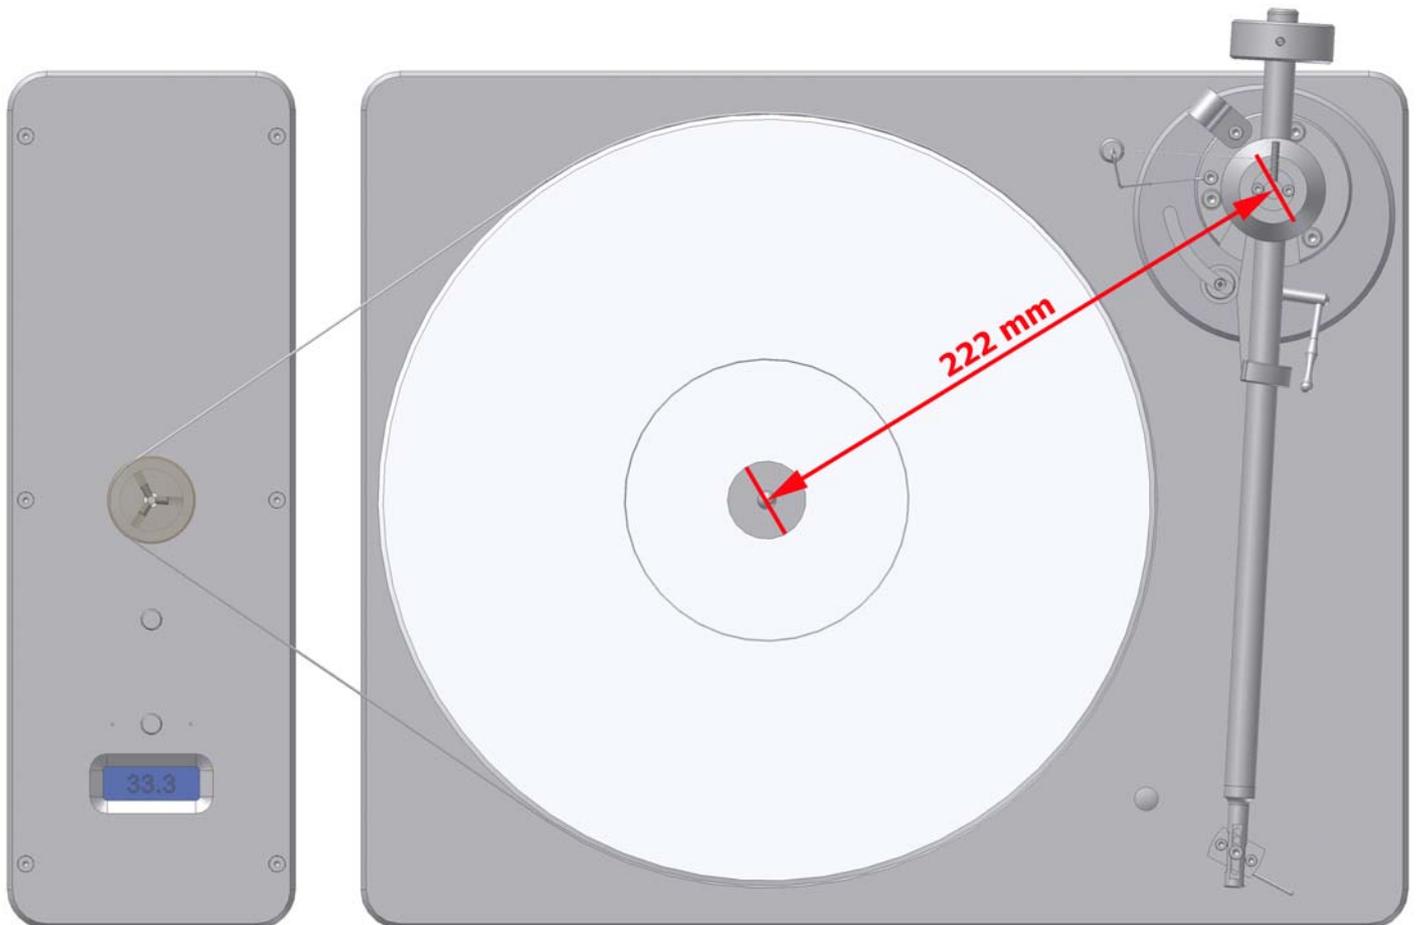

Place the arm tube on to the pivot point and lock it into it's arm rest. Use the cable strain relief screw (M4x10) and washer (red marked screw in the picture below) to secure the cable to the tonearm base.

Pic. 11: Mounting the tonearm

Insure that the distance from the spindle to the pivot point of the tonearm is exactly 222 mm. Moving the armboard in one direction or another will allow you to locate the correct position. Once located, tighten the armboard down. Shown in the picture below. You can also use the optional clearaudio cartridge alignment gauge.

For the exact adjustments should be the cartridge mounted! Please follow therefor the instructions of the cartridge user manual!

Ambient

User manual

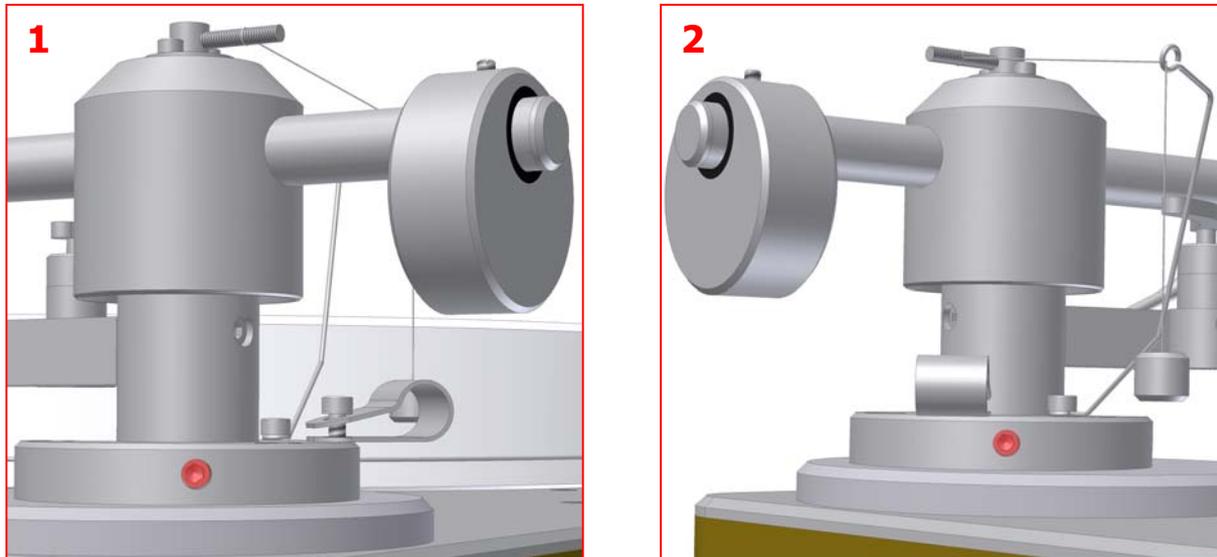

Attach the clearaudio Turbo Weight on the end of the tonearm (1). Set tracking force using the clearaudio Exact stylus pressure gauge (see cartridge instructions for recommended tracking force range). Adjusting tracking force is accomplished by moving the weight towards or away from the pivot point on the shaft (to 1). **Note:** *When tightening the counter-weight, insure that the weight is perfectly vertical otherwise this may affect your cartridges azimuth settings.*

Pic. 13: Mounting the tonearm

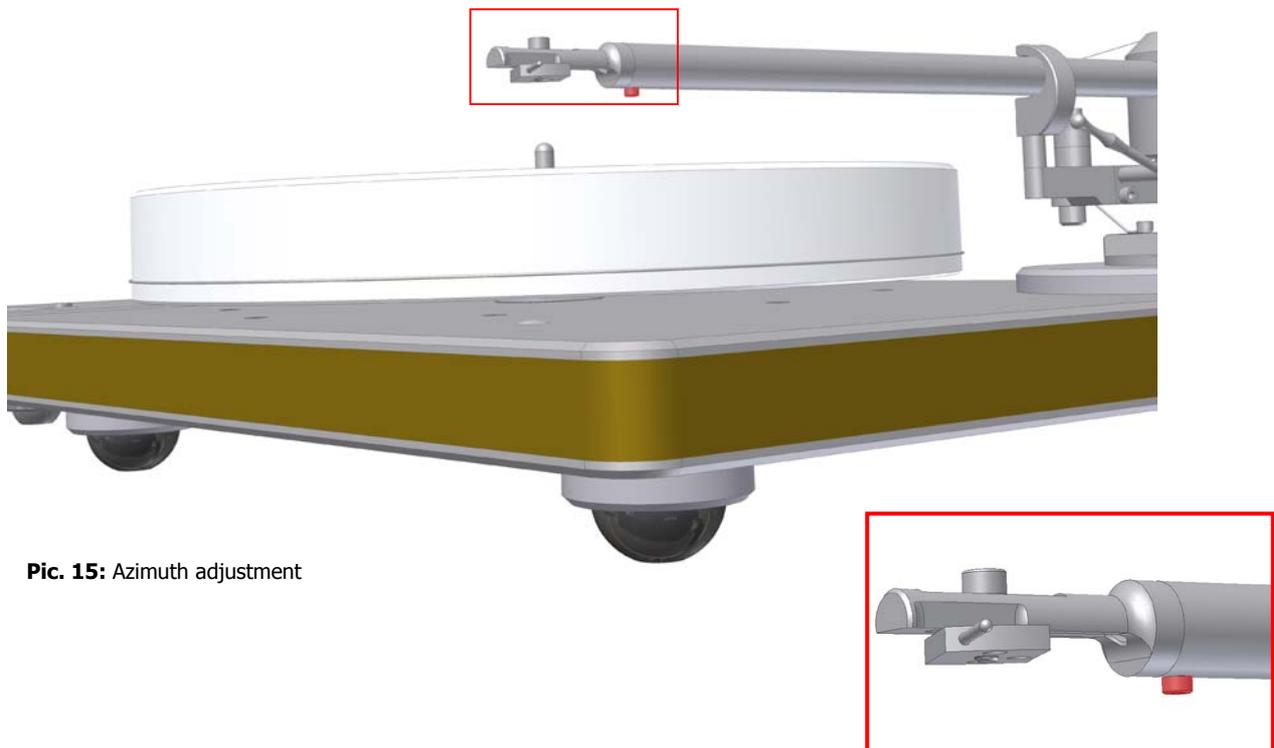

Feed the anti-skate weight through the anti-skate support wand and secure it to the threaded shaft at the top of the tonearm bell (to 3). **Note:** *Attaching the string to the position closest to the pivot point is equal to approx 0.5 grams of anti-skate. Each additional 1/8" out on the shaft will give you another 0.5 grams of anti-skate force with a maximum of 3.0 grams if affixed to the end of the shaft. (green arrow = lesser antiskating / red arrow = more antiskating).*

VTA adjustments are accomplished by loosening the two lock screws on the side of the armboard base (shown in picture 1 and 2). Once loose, you can move the arm up or down to achieve the desired VTA. Tighten both screws when finished. Re-check tracking force after adjusting VTA.

Pic. 14: VTA-adjustment

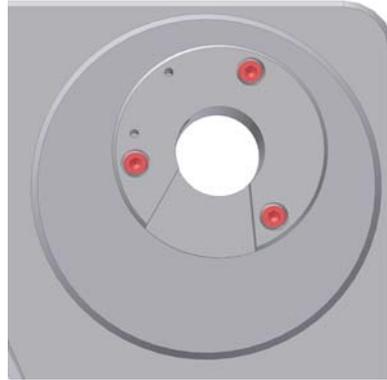

Azimuth adjustments are facilitated through the small (1,5 mm) Allen screw (red marked screw) on the bottom side of the armwand where the headshell enters the carbon fiber. Once you loosen this screw, you'll be able to rotate the headshell a small amount in either direction. Be sure to tighten the screw when done.

Pic. 15: Azimuth adjustment

4.2 Satisfy mounting

To mount the tonearm base to the Ambient armboard please use the screws without nuts (M4x20) and place it like the red marked screws.

Pic. 16: Mounting the tonearm base for Satisfy

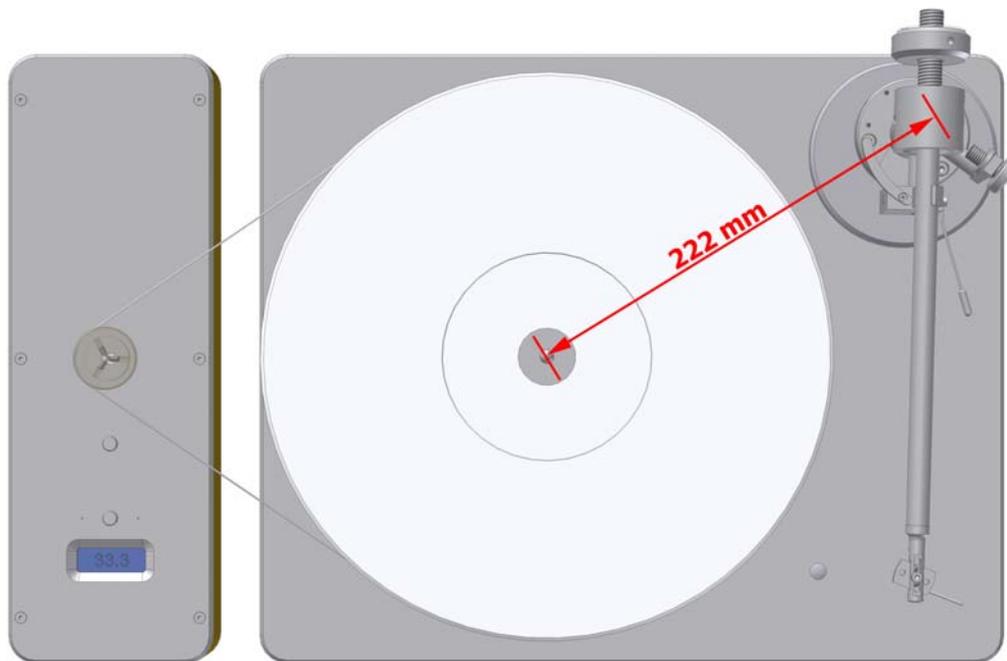

Please put careful the cables and the tonearm through the armboard, pay attention that no wire will be damaged! Now fix the tonearm with the 2 screws on the right and the left side, not to much, so that you can adjust it in the next steps!

Pic. 17: Mounting the clearaudio Satisfy tonearm

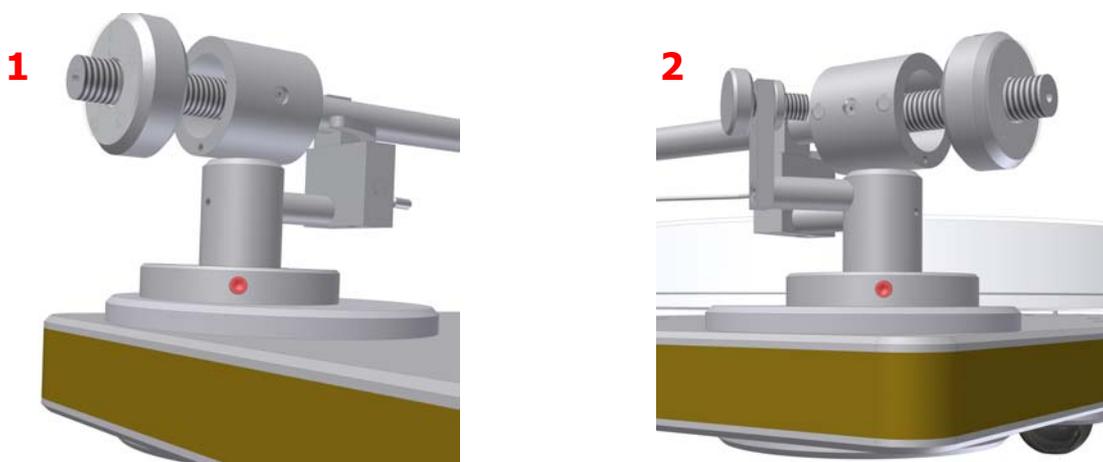

Insure that the distance from the spindle to the pivot point of the tonearm is exactly 222 mm. Moving the armboard in one direction or another will allow you to locate the correct position. Once located, tighten the armboard down. Shown in the picture below. You can also use the optional clearaudio cartridge alignment gauge.

For the exact adjustemts should be the cartridge mounted!

Pic. 18: Mounting the clearaudio Satisfy tonearm

VTA adjustments are accomplished by loosening the two lock screws on the side of the armboard base (shown in picture 1 and 2). Once loose, you can moove the arm up or down to achieve the desired VTA. Tighten both screws when finished. Re-check tracking force after adjusting VTA.

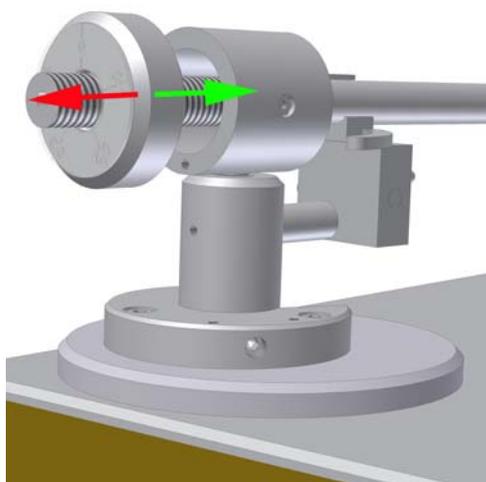

Pic. 19: VTA adjustment

Azimuth adjustments are facilitated through the small (1,5 mm) Allen screw (red marked screw) on the bottom side of the armwand where the headshell enters the carbon fiber. Once you loosen this screw, you'll be able to rotate the headshell a small amount in either direction. Be sure to tighten the screw when done.

Pic. 20: Azimuth adjustment

Wind the counterweight on the tonearm-tube. You can adjust the tracking force of your cartridge by turning the counterweight (shown in the picture below) (**green arrow = more tracking force / red arrow = lesser tracking force**).

Pic. 21: Adjustment of the tracking force

Now you are ready for the antiskating adjustment. This also depends on the tracking force of the cartridge and the diamond shape.

<u>alignment of the antiskating</u>		<u>tracking force</u>		<u>position of the antiskating-screw</u>
minimal antiskating	→	10 – 15mN	→	see illustration 1
medium antiskating	→	15 – 20mN	→	see illustration 2
maximum antiskating	→	20mN and more	→	see illustration 3

The general set-up is now finished.

Connect your *Satisfy*-tonearm now with the phono input of your phono-preamplifier. (More information on adequate phono-preamplifiers and interconnects you can find on our Website www.clearaudio.com).

You can now place a record on the platter, affix it with the enclosed clever-clamp and finish your cartridge adjustments.

Now you are finally ready to play your vinyl records.
We wish you a lot of pleasure with your new *Ambient*-turntable.

5. Special information

To achieve the full **clearaudio** warranty, it is necessary that you fill out and send the corresponding part of the warranty registration card back to clearaudio, within two weeks after purchase. Only if the product is returned in it's original packing **clearaudio** can provide the warranty.

Transportation advice: If any transportation of the *Ambient*-turntable should be necessary, please always remove the turntable platter. Otherwise serious damage can occur! The bearing hole needs to be covered as well, to avoid any dust coming into the bearing. Always take of the pulley of the motor unit as well, to prevent the motor shaft from any damages.

If the *Ambient*-turntable is a longer time not in use, please disconnect the motor from the mains supply.

Every two years you can lubricate (only if you will recognize speed variations) the bearing of the turntable platter with the delivered oil. In this case it is enough to put 4 or 5 drops of the oil into bearing.

Please take special caution to any damages of the power cord. Any damages should only be repaired only by authorized personal. A damaged power cord must be exchanged immediately!

6. Service

If any service or repair on all **clearaudio** products is necessary, please contact your dealer / distributor or contact **clearaudio** directly. We will inform you about your nearest service location.

PLEASE RETAIN ALL ORIGINAL PACKAGING. You will need it if this unit has to be transported and/or shipped. Any further questions you may have about this turntable should be directed to the distributor or directly to **clearaudio** at
