

Loving music

For over 30 years, Clearaudio has been creating technologically innovative solutions for the vinyl music lover. Today, these solutions are broader in scope than ever, and are an important part of Goodwin's ability to demonstrate reference analog at all budget levels.

The Clearaudio **Concept** turntable package (available in MM and MC versions) is a world class plug-and-play turntable. Sleek, simple and (most importantly) it makes music come alive. As a bonus, mere mortals can afford it.

The new Clearaudio **Goldfinger Statement** cartridge goes where no cartridge has gone before, and improves on the already sublime GoldfingerV2.

Through the use of a more powerful 12 Magnet Ring configuration (8 in the V2) and pure 24 Karat gold coils with 30% thinner wire, the new Statement is both more dynamic and more delicately resolved. Beyond the reach of mere mortals, but for those with heavenly aspirations...

Call to audition Clearaudio products in one of our state-of-the-art showrooms.
